INDIAN INSTITUTE OF TECHNOLOGY (BHU), VARANASI

The Indian Institute of Technology (Banaras Hindu University) owes its existence to Mahamana Pandit Madan Mohan Malviya, Bharat Ratna -the founder of the first residential university of modern India, Banaras Hindu University, who could foresee the vital role of technical education in strengthening independent India. Engineering education in BHU started in 1919 with the establishment of Banaras Engineering College (BENCO). The next stage of development saw the establishment of College of Technology (TECHNO) and College of Mining & Metallurgy (MINMET). In 1968, the erstwhile engineering colleges of BHU, namely BENCO, MINMET, and TECHNO, were merged to form the Institute of Technology (IT-BHU). IT-BHU has been admitting students through the JEE conducted by the IITs since 1972. The erstwhile IT-BHU was ranked consistently amongst the top engineering institutions of the country. IT-BHU became IIT (BHU) on June 29, 2012, by an Act of Parliament. Following conversion to IIT, the Institute engaged itself in taking up the mammoth task of putting many of the procedures and practices similar to those of IITs.

Centenary Celebration and Global Alumni Meet:

The centenary celebrations started from Basant Panchami day of 2018 (22 February 2018) to commemorate the glorious journey of 100 Golden years of our institution and will continue up to the Basant Panchami day of 2020. In this period, the IIT(BHU) will take stock of its journey through the last 100 years and assess its current strengths *vis-à-vis* the national grand challenges and its future role as a premier institute of the country. Several events have been planned, and some of them already carried out as part of the Centenary Celebrations during the year(s) 2018-2020. A significant occasion was the exciting 4-day event on the Centenary theme of *Next 100 IIT(BHU)* that took place from 8th Feb to 12th Feb 2019 during the Institute Centenary & Basant Panchami Day (10th February 2019) and the Global Alumni Meet.

As a mark of recognition of Centenary Celebrations of the institute, Hon'ble Prime Minister Shri Narendra Modi inaugurated PARAMSHIVAYat IIT (BHU) Varanasi, the Super Computer of 833 teraflop capacity under the National Supercomputing Mission. He also released a postage stamp and postal album, which bore a picture of the main building of IIT(BHU).

Notable among eminent guests from the Government were Hon'ble Chief Minister Of Uttar Pradesh Shri Yogi Adityanath as the chief guest, Hon'ble Minister Shri Manoj Sinha, to name a few. Several students, faculty, and around 500 alumni families from all across the world enjoyed attending the Institute's Basant Panchami Jhanki, Industry Knowledge Conclaves, Entrepreneurship Events, Kavi Sammelan, and other cultural events.

During these events the institute apprised various stakeholders about the centenary projects like Centenary Innovation and Research Park (CIRP), Centenary Defence and Precision Engineering Hub (CDPEH), Global Outreach and Engagement Centre (GOEC), Malviya Student Activity and Computing Centre (MSACC), and construction of New Hostels. Five Centenary Chairs were also instituted to create a state-of-the-art teaching and research environment in the institute. The establishment of seven centers on emerging thrust areas of research and education is another centenary initiative taken up by the institute.

Academic Activities:

The Institute has maintained a high academic standard since its inception. It has turned out luminary engineers and administrators who served the nation with distinction. The current student strength is 6548 with 3341 B.Techs, 1325 IDD, 15 B. Arch., 756 M.Techs, 37 M.Sc., and 1074 Ph.D. students. The current strength of regular faculty members of the Institute is 288. In addition to this, 37 non-regular faculty members also contribute to the academic activities of the Institute. Furthermore, the number of technical/scientific staff is 257, and the non-technical staff is 162. At present, the Institute has 15 Departments and three interdisciplinary Schools that include the newly established

Department of Architecture, Planning, and Design. Central facilities in the Institute include the recently established Supercomputing Centre, Computing and Information Services (CCIS), Central Instrumentation Facility (CIF), Main Workshop, Institute Main Library, and Industrial Consultancy & Testing Services. Teaching and Learning Cell continues to cover all aspects of pedagogy, course delivery, laboratory projects, assessment, and facilitating online courses. Institute has also started two-year M.Sc. programs in Physics and Chemistry from this academic session.

Induction Programme:

A notable achievement of the Institute pertains to a one-week Induction Program. About 1200 UG students admitted in the current session took part in it. The Induction Program facilitates the acclimatization of the new entrants to their new institution as well as home. Along with getting to know about the institute, there are features of this program that makes them fitter for future challenges. The Induction Program intended the assimilation of the new students in the ethos and culture of the institution based on broader national and human good. It also encourages bonding within the first year batch, cutting across branches.

Two essential components were the pillars of the design of this program. The first pertains to physical education, human values, creative practice, and basic english along with project work. In the second initiative, the students were taken to various places to know the city and the people; they listened to inspiring lectures by eminent personalities, they were exposed to less supervised interactive learning on all aspects, and were encouraged to understand their social responsibilities while pursuing academics.

The Program witnessed interactive sessions with many eminent personalities including four Padma Shri Awardees and renowned Professor Prof. H. C. Verma, alumni from various IITs, famous author Mr. Shubha Vilas, social workers, environmentalists, historians, medical doctors, psychologists and also an Origami artist. The sessions sowed seeds of interest in young minds for various fields of academics, career, skill development, art, and wellness, for a holistic learning experience.

Research & Development activities:

Our Institute has a mission to fulfill the needs of the nation through Research and Innovation. Faculty members and students are engaged in cutting edge research under various schemes. To inculcate research culture in the students, the institute has set up Tinkering Labs. Students are involved in research projects from almost the first stage of their education. The institute gives partial support to the research initiatives of faculty members through grants like Seed Money, Research Support Grant, and R&D Thrust Area Grants. The institute also provides Lab Grants for up-gradation of teaching labs and supports Central Instrument Facility acquisitions.

Unnat Bharat Abhiyan:

Unnat Bharat Abhiyan (UBA) is an MHRD initiative with a total sanctioned cost of Rs 3.50 crore and aimed at solving technological problems of common man. This project is a joint venture of all IIT and many other Institutes of National Importance. UBA is conceptualized as a movement to connect institute of higher education with local communities to address the development challenges of rural India through appropriate technological inventions.

IIT(BHU) has been working on a number of aspects and their related technology since inception of this programme. The problem of solid waste management, technical support for rural problems, portable water quality, hygiene and sanitation, energy, education, housing and health care, making the villagers aware of government schemes are the

main objectives of this programme. With these objectives several villages in and around Varanasi and Mirzapur were adopted and IIT(BHU) students are actively involved in counseling and providing the necessary technical inputs (such as, preservation and promotion of rural crafts, advice for sanitation and hygiene, rainwater harvesting, solar lights for community, forestation, drinking water quality, etc.) to the villagers.

Malaviya Centre for Innovation, Incubation & Entrepreneurship (MCIIE):

Institute Works Department (IWD) & Infrastructure Development:

Infrastructure development is the need of the hour for us. Apart from the several renovation and upgradation works (Ground floor of existing library building, Restoration of Chimni, HPC building, IRMA Laboratory, etc.) carried out by IWD, major works completed through CPWD (civil) in the last one year are: (i) Construction of Girls Hostel (G+6), (ii) Construction of Faculty Apartment (G+5) of 1st block and 2nd block, (iii) Extension of School of Materials Science and Technology building, (iv) Construction of HPC substation. Construction of Teaching & Learning centre (G+1) building is in progress. In addition to these, the following three projects, as per the details given hereunder, have been approved for funding through HEFA :

1. Construction of New Boys Hostel (G+7) (Phase-I, Tower-I) in place of existing Dhanrajgiri Hostel:

The building of the existing hostel has become quite old and its parts have started falling down. In view of this, the existing building requires to be demolished and a new hostel is to be constructed for providing hostel facilities to the male students of IIT (BHU). The total cost of this Project is **Rs. 49.66 Crore.**

2. Construction of Student Activity Centre with indoor sports facilities (G+1) :

For hosting the extracurricular activities of the students, a dedicated student activity centre building is needed to cater to the genuine demand of various councils and clubs related to cultural and technical activities. Further, the Institute has inherited 3 playgrounds only with no infrastructure for indoor sports and various extracurricular student activities. The Institute is slated to host Inter IIT Sports meet in the year 2020. In order to meet the demand for various indoor activities, a common building for badminton, table tennis, squash, etc., is required. The total cost of this Project is **Rs. 27.80 Crore.**

3. Construction of Apartment (G+8) for faculty & officers:

Presently, the Institute does not have sufficient number of residential quarters for providing accommodation to their Faculty and non Faculty members. Thus, for providing in-campus accommodation to them, the proposed construction is very much required. The total cost of this Project is **Rs. 40.01 Crore.**

To execute these projects, MoUs have been signed with CPWD and further actions are being taken by them.

In addition to the above the following two projects are also under pipeline, for funding through HEFA :

1. Construction of Morvi Hostel-II (S+10) and Dining Block (3 floors) :

Presently, the Institute is facing acute shortage of hostels and faculty residential quarters. Most of the hostels in the Institute are quite old and also rooms of the hostels are either double or triple seated. As such, to overcome the shortage of hostels this project is proposed. The total cost of this Project is **Rs. 97.00 Crore.**

2. Construction of new Faculty Apartments (Two Units) near Vishwakarma Hostel :

Shortage of faculty residents in IIT (BHU) causes huge inconvenience to the existing faculty members, and prospective new faculty members also show reluctance in joining IIT (BHU) due to non-availability of campus accommodation. As such, to overcome the shortage of faculty residences, this project is proposed. The total cost of this Project is **Rs. 50.00 Crore.**

Besides above, another project namely **Teaching Learning Centre Building (G+1)** in the Institute is under construction under Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMMNTT) scheme and likely to be completed by the end of November this year. The total cost of this project is about Rs. 5.72 Crore.

This Teaching and Learning Centre is to be setup an independent unit within Institute with the following aims :

- To organise training programs for faculty to improve their teaching.
- To make available and to develop e-learning content and other support services for students, and

- (iii) To develop motivational and life centric though among all members of institutional community as well as external society.

The Centre is expected to develop effective and efficient teachers who are responsive to the needs of the learners in both local & global context, in world class educational system and the diversified knowledge requirement of the contemporary society. It reinforces the goals of the national mission “Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching” (PMMMNMTT).

Training and Placement:

The Training and Placement cell of IIT (BHU) facilitates the process of placement of students passing out of the Institute. The office liaises with various industrial establishments, corporate houses, etc. to help them to select our graduate and post-graduate students from all disciplines and programmes. During 2018-19, 183 companies visited the campus for holding campus interviews and made a total of 999 offers. There is an increase of 26 % compared to 790 offers in the previous year. The average pay package has also increased by 19%. The industries visiting us were of varied nature: Core Engineering industries, IT & IT-enabled services, Manufacturing Industries, Consultancy Firms, Finance Companies, Management Organizations, R & D laboratories. Some of the best companies have hired our students. IIT (BHU) boasts of some of the best placement packages among the IIT's.

The Cell also collaborates with leading organizations and institutes in setting up of internship and training program for our students. The Cell has managed to arrange 437 paid internship through campus selection during 2018-19, and this saw an increase of 11% compared to 394 selections in 2017-18. The minimum, average and maximum internship amount has been 20 K, 23.80 K and 200 K per month respectively. The Cell also arranges internships for outside students. In 2018-19, 441 outside students took internships at this Institute.

Students' Activities and achievements:

The Institute nurtures technical, social, cultural, and sporting activities pursued by the Students' Gymkhana through different councils, Students' Parliament, and other student groups. Besides games and sports, the artistic and creative talents of students are encouraged through various activities like dramatics, debates, music, visual arts, etc. and clubs like Radio, Audio, Photography, Automobile, Aero-Modeling, Cine and Computer Club. Students Gymkhana successfully organized its annual techno-management festival Technex, cultural festival Kashiyaatra & games event Spardha. Apart from these, students of IIT(BHU) participated in various IIT meet and brought laurels to the Institute.

(i) Cultural Activities:

IIT Roorkee hosted the third 'Inter IIT Cultural Meet' in December 2018, with many IITs participating in this cultural extravaganza. The IIT(BHU) Contingent bagged the fifth position in the overall championship and stood first in a stage play and English poetry competition along with being the overall dramatics winner among all IIT teams. The disciplines of music, literature, and arts came together in the three-day-long cultural festivals of IIT(BHU), Kashiyaatra 2019. There was a multi-fold increase in participation this year. All seven clubs of the council organized and participated in a wide variety of events.

(ii) Games and Sports Activities:

The Games and Sports Council of our institute participated in various tournaments in the past year and bagged a total of 37 medals in the external competitions comprising of Inter IIT Sports Meet 2018 held at IIT-Guwahati where we secured an overall 8th rank, Sportstech, IIT-Delhi 2019, Sangram IIT-Roorkee 2019 and Spree BITS-Goa 2019. For the very first time, Para events were also organized in the Inter IIT Sports Meet and our contingent won 2 medals in the para powerlifting event. The 2019 edition of Spardha partnered with UNICEF to spread awareness for social causes, which was presided by guests like MandeepJangra.

(iii) Activities by Science and Technology Council:

The Council initiated and undertook various projects to provide innovative solutions to real-world problems. These include TrashCash, Q-Lock, Tesla Coil, Asteroid Mining, which provides an innovative and economic

mechanism for the extraction of metals on asteroids in space and many others. IIT(BHU) bagged an overall 5th position among 23 participating IIT's in the 7th Inter IIT Tech-Meet held in IIT-Bombay. उन्होंने यह भी बताया कि हिन्दी में शोध कार्य एवं इंटरनेट पर हिन्दी में किसी विषय की उपलब्धता अभी भी कम है। तकनीकी संस्थानों द्वारा हिन्दी को आगे बढ़ाने का प्रयास किया जा रहा है। उनके द्वारा हिन्दी के क्षेत्र में कार्य करने से हिन्दी का और अधिक विकास होगा।

कार्यक्रम का समापन संस्थान के संयुक्त कुलसचिव (प्रशासन) श्री राजन श्रीवास्तव के धन्यवाद ज्ञापन से हुआ।

Year of Establishment: 1924

Head of the Department : Prof. D. Kumar (w.e.f. 14.03.2016)

1. Brief Introduction of the Department:

The founder of Banaras Hindu University, Pandit Mandan Mohan Malviyaji instituted courses in Glass and Ceramic Technology as early as 1924 with the noble objective of advancing glass and ceramic technology in India. The Department offers B. Tech, B. Tech - M. Tech. (Dual Degree), M. Tech. and Ph. D. degrees in Ceramic Engineering. M. Tech. and Ph. D. programs are interdisciplinary and are also open to those students of allied branches of Engineering and Sciences, who qualify GATE or NET-Sponsored candidates from industries and R&D organization are also admitted in the PG Programs. The Department is pursuing active research in the emerging areas of glass, glass ceramics, bio-glass and bio-glass ceramics, refractories, ceramic white-wares, pottery & porcelain, cement, electrical and electronic ceramics. Research papers are being published in reputed national and international Journals regularly.

The Department regularly works in collaboration with Academic and Research institutions, National Laboratories and various Ceramic industries through regular contacts, visits, seminars, symposia, workshops and conferences. The Department has also been rendering technical advice and consultancy to the industries under Industrial Consultancy and Testing Services of the Institute from time to time. The contribution of this very Department of Ceramic Engineering during past is unparallel to the entire industrial, research and development and educational areas in the country. The Department is having number of projects funded by different government and private organization. For enhancing collaboration with Academic and Research Institutions globally, the Department has **MOU with University of Connecticut and Oklahoma USA**, to create research and testing facilities for industrial development established **IIT (BHU) – IRMA Centre of Excellence for Refractory** with participation of Industrial Organizations and to work for technology up-gradation and support for Small and Medium sized ceramic and glass industries created **Mahamana Glass and Ceramic Technology Skill Development Centre**.

Year of Establishment: 1921

Head of the Department: Prof. Pradeep Kumar Mishra (w.e.f. 14.03.2016)

1. Brief Introduction of the Department/School:

Department of Industrial Chemistry was established in 1921 at Banaras Hindu University. Subsequently, it was renamed as the Department of Chemical Engineering and Technology in 1956. The Department has established several benchmarks of achievements in teaching and research. It modernizes its programmes to impart education in upcoming areas of chemical engineering.

The Department presently offers courses leading to B.Tech., M.Tech. and Ph. D. degrees in Chemical Engineering. The Department also offers courses to IIT(BHU) and Banaras Hindu University. In the new undergraduate curriculum, the department has been entrusted to offer a number of institute level courses either independently or jointly with other departments. The research facilities of the department are utilized not only by other departments of the institute and BHU but also by other teaching institutions and research laboratories.

The floor area of the department is 4,002 sq. meter. The department 18 laboratories, a workshop, 7 lecture theatres, a 250 seat auditorium, a library having over 11,000 volumes of text and reference books and a textbook bank and internet facility. The Department also has a seminar room and a few instruction rooms and rooms for its faculty.

The University Grants Commission, New Delhi has granted the Department the Status of Centre of Advanced Study in Chemical Engineering. The Department also enjoys the status of DST – FIST Sponsored Department.

The Department enjoys an excellent rapport and professional interaction with various industrial organisations. Faculty members are engaged in high level consultancy work in industry, where as some others have projects funded by the industry. Besides these, the Department also provides know-how for process improvement/development, raw materials and products analysis, pollution monitoring facilities, etc. to the industries in and around Varanasi.

Major areas of Research

Currently major areas of research in the department are waste water treatment, separation processes, catalysis, biotechnology and fuel cell. The department has identified three major thrust areas for future research as energy, environment and nanotechnology with emphasis on developing affordable solutions for the problems in the country such as drinking water, energy (harvesting, production and storage) and healthcare.

Glimpses of Laboratory/ Equipments in the Department/School

The scanning electron microscope (SEM) uses a focused beam of high-energy electrons to generate a variety of signals at the surface of solid specimens. The signals that derive from electron-sample interactions reveal information about the sample including external morphology (texture), chemical composition, and crystalline structure and orientation of materials making up the sample. In most applications, data are collected over a selected area of the surface of the sample, and a 2-dimensional image is generated that displays spatial variations in these properties.

X-ray Photoelectron Spectroscopy (XPS) also known as Electron Spectroscopy for Chemical Analysis (ESCA) is the most widely used surface analysis technique because it can be applied to a broad range of materials and provides valuable quantitative and chemical state information from the surface of the material being studied.

ICP (Inductively Coupled Plasma) Spectroscopy is an analytical method used to detect and measure elements to analyze chemical samples. The process is based on the ionization of a sample by extremely hot plasma, usually made from argon gas.

8. Department of Civil Engineering

Year of Establishment: 1949

Head of the Department: Prof. Prabhat Kumar Singh (w.e.f. 14.03.2016)

1. Brief Introduction of the Department:

The Civil Engineering Department was established in 1949 (then known as Civil and Municipal Engineering) in BENCO (Banaras Engineering College) which was a part of BHU. The formal sanction of the Visitor of the University to create this Dept. was received in 1956 and the B.Sc Engineering (Civil & Municipal) Degree was recognized by the Govt. of India in 1958. The department was rechristened to the present name in the year 1975. Presently, it caters its student with seven specialized Post Graduate courses like Environmental Engineering, Geotechnical Engineering, Hydraulic Engineering, Structural Engineering, and Transportation Engineering. The department has taken up various research programmes apart from regular teachings and the research activities, namely CSIR, UGC, SAP, HUDCO, DST and AICTE. It has a created cooperation with industries to work for the various tasks given by Govt., Semi-Govt. and other Private organisations. It is particularly dedicating in providing solutions to the people of the country with technical solutions and guidelines. It conducts short-term courses, training courses, seminars, workshops and conferences for enrichment in quality of students and entrepreneurs. The department has its own Civil Engineering Society which is dedicated in organising lectures by various experts in their respective field, group discussions, competitions, sports and various other extra-curricular and cultural activities so that there would be an holistic all round development of students. Also this society conducts a separate fest for the Civil Engineering Students, known as, Shilp.

10. Department of Electrical Engineering

Year of Establishment: 1919

Head of the Department : Prof. Devender Singh (w.e.f. 09.05.2018)

1. Brief Introduction of the Department/School:

Mahamana Pt. Madan Mohan Malviya founded BHU in the year 1916, with benevolent and magnanimous contributions of the then maharajas and other persons of eminence. The University was nurtured by Sir Sunderlal, as the 1st V.C. of the university, followed by the great visionaries, such as Pt. Madan Mohan Malviya, Acharya Narendradev, Sir S. Radhakrishnan and many other eminent personalities.

The Benaras Engineering College (BENCO) was started in the year 1919, with its strong foundation laid by revered Prof. Charles A. King, Prof. H. P. Philpot and Prof. M. Sengupta. With the passage of time, College of Mining and Metallurgy (MINMET) and College of Technology (TECHNO) were included, expanding its horizon. These three colleges were merged and named as Institute of Technology in the year 1968 with a view to give more autonomy for its better perspective in terms of academic as well as administrative decisions. Its undergraduate students are admitted through Joint Entrance Examination (JEE) being conducted for all IITs.

Since the inception of BENCO in 1919, combined Bachelor's degree in Mechanical and Electrical Engineering was awarded till 1952. Department of Mechanical Engineering and Department of Electrical Engineering were separated in 1953 and conferred separate degrees in respective disciplines.

Presently, Department of Electrical Engineering runs five post graduate (M. Tech.) programmes in Electrical Machines and Drives (started in 1956), Power Systems (started in 1964), Control Systems (started in 1964), Power Electronics (started in 1982) and Interdisciplinary Systems Engineering (started in, 1982) and Ph. D. programme in all disciplines of Electrical Engineering. The department has also a five year Integrated Dual Degree Program (started in 2006) leading to Masters degree with specialization in Power Electronics.

The department has been sanctioned Special Assistance Programme (SAP) of UGC since 1988 and COSIST program of UGC from 1995 to 2000. Apart from these, the department has been conducting research projects funded by DST, AICTE, CPRI and other R&D organizations of Govt. of India.

Department has very good placement records over the years. The students of this department are joining core companies such as PGCIL, IOCL, HPCL, Trident, Reliance, Maruti, etc. Electronics companies such as Broadcom, Sony, etc are also regularly recruiting students of this department. Our students are also regularly joining software companies such as Morgan Stanley, Goldman Sachs, Citrix, Oracle, SISO, etc. The vast number of job offers is mainly due to the versatility of the branch which ensures that students are allowed to sit for interviews in software, core electrical, electronic as well as non technical companies.

Some of the department's famous alumni includes, Mr. Nikesh Arora: Senior Vice President and Chief Business Officer at Google, Mr. Rajiv Dogra: Indian diplomat, Ex- Consul General to Karachi, Pakistan, Mr. Gyanesh Pandey: Co-founder, CEO and CTO of Husk Power Systems and Mr. Narla Tata Rao: Winner of Padma Shree, a doyen of power sector in India.

The department is pursuing academic activities with the following goals and objectives:

- Further up-gradation and technological modernization of infrastructural facilities.
- Encouraging teaching innovations through audio visual and multimedia aids.
- Channelizing expertise of faculty in the frontier areas of electrical engineering.
- Research, testing and consultancy.
- Training the undergraduate and post graduate students towards entrepreneurship in consonance with liberalization and privatization policies of the Government.
- Development of energy efficient, environment-friendly electrical technologies as per the norms set by various planning, regulatory and other statutory bodies

11. Department of Electronics Engineering

Year of Establishment: 1971

Head of the Department/School: Prof. V. N. Mishra (w.e.f. 09 .05. 2018)

1.1 Brief Introduction of the Department/School:

The Department of Electronics Engineering came into existence as an offshoot of Electrical Engineering Department in the year 1971 with a great effort from Prof. S.S. Banerjee. In the same year the erstwhile Banaras Engineering College (BENCO), College of Mining and Metallurgy and College of Technology were amalgamated to form the Institute of Technology-Banaras Hindu University (IT-BHU). The Department offers Bachelor, Master and Doctoral programs in Electronics Engineering with the major thrust areas of Microelectronics, Microwave Engineering, Digital Techniques & Instrumentations and Communication Systems. The Department has been actively engaged in research since its inception as evidenced by the research publications. The first major financial support from the Department of Electronics (DoE), Govt. of India in the tune of Rs.1.0 Crore was received by the Department in 1980 to carry out research for development of High Power Microwave Tubes. Subsequently, in recognition of excellent research contribution, the University Grants Commission (UGC) identified the Department to provide financial support under Special Assistance Program (SAP) in 1983 for five years. During this period, the department established three independent research centers e.g., Centre of Research in Microwave Tubes (CRMT), Centre for Research in Microelectronics (CRME) and Centre for Research in Microprocessor Applications (CRMA) supported by UGC/MHRD. The Department was further recognized as a Centre of Advanced Studies (CAS) by the UGC in 1989. The Department successfully completed three phases of CAS in the year 2009. The Department is also one of the DRDO centers for M.Tech. in Electronics Engineering. In addition to this, the Department has been actively pursuing manpower training and collaborative research programs in specialized areas to meet the national manpower requirement in R&D laboratories, academic institutions and industries. The Department has a close interaction with many reputed national R&D laboratories such as DRDO, CSIR, Bharat Electronics Ltd. and leading software companies as well as foreign Universities.

Photoluminescence (PL) measurement setup (F980) from Edinburgh Photonics, UK. This setup can provide PL from 200-800 nm.

Vacuum evaporation and deposition systems (FL 300 and BC 300) from Hind High vac, Bangalore, India. These setup works with e-beam evaporation (FL 300) and thermal evaporation (FL 300 and BC 300) for depositing thin films.

An "anechoic chamber" ("an-echoic" meaning non-reflective, non-echoing or echo-free) is a room designed to completely absorb reflections of either sound or electromagnetic waves. They are also often isolated from waves entering from their surroundings.

(Anechoic Chamber with 6 axis position for RF Characterization (upto 20GHz))

13. Department of Metallurgical Engineering

Year of Establishment: 1923

Head of the Department: Prof. N.K. Mukhopadhyay (w.e.f. November 2017)

1. Brief Introduction of the Department :

The Department of Metallurgical Engineering, established in the year 1923 has pioneered metallurgical education and research in the country. The far-sighted vision of Mahamana Pandit Madan Mohan Malaviyaji has helped this Department to attain such a distinction. This is now a part of IIT (BHU). The UG programme began in the year 1923 itself and the first ever undergraduate and doctoral degrees in metallurgy in the country were awarded by this Department in the years 1927 and 1955 respectively. This is also one of the first two Departments in the country to confer a postgraduate degree in metallurgy in the year 1959. The undergraduate programme was set on a firm foundation by the first Head of the Department, Professor Nagardas Purushottam Gandhi. The postgraduate programme was nurtured by the second Head of the Department, Professor Daya Swarup. Professor Tanjore Ramachandra Anantharaman, the third Head of the Department, established a fine research school of metallurgy, firmly rooted in exemplary traditions and ensured all-round growth and high profile image of the Department. Subsequently, illustrious successive Heads of the Department have continued to do their utmost to enhance the levels of excellence that the Department is known for. The Department celebrated its Golden Jubilee in the year 1973, Diamond Jubilee in 1983 and Platinum Jubilee in the year 1998 in a befitting manner.

The Department of Metallurgical Engineering has so far produced 2626 graduates, 531 postgraduates (including M.Tech dual degree) and 189 Ph.D. degree holders. The first one is a record for any Metallurgy Department in the country. The outstanding research contributions of the Department culminated in its recognition as a Centre of Advanced Study (CAS) in Metallurgy by the UGC in 1980, the first-ever Engineering Department to be so recognized in the country and the first one in our University. International collaboration/achievements by the Department/School (From 1st April 2018 to 31st March 2019)

UK India Research and Education Initiative (UKIERI)

UKIERI supports bilateral research between the institutions of India and United Kingdom. Two eminent researchers namely Prof. Jason Love and Dr. Carole Morrison from the The University of Edinburgh, Scotland and Prof. Kamal Singh of Department of Metallurgical Engineering, IIT (BHU) in India are trying to develop a non-hazardous process to recover most of the inherent metals available in waste printed circuit boards. The project has wide applicability across the globe because of high growth of waste generation it is even more relevant for developing countries like India which have high population using cheaper electronic gadgets with frequent change.

Funding: GBP 29,000.00 jointly by UGC (GoI) & British Council (UK) for 2018-2020.

14. Department of Mining Engineering

Year of Establishment: 1923

Head of the Department : Prof. Piyush Rai

Brief Introduction of the Department/School:

The Department of Mining Engineering a well conceived dream of the founder of this university **PANDIT MADAN MOHAN MALVIYAJI** and the oldest Mining Engineering Department in the country, came into existence as early as 1923, as a section of the Department of Geology, Mining and Metallurgy. Later, in the year 1944, separate departments of Mining and Metallurgy were constituted under the College of Mining and Metallurgy.

The first Ph.D. degree in Mining Engineering in the country was awarded from this department in the year 1964. This lead was further strengthened by introducing the First Post- Graduate course in 1966 leading to M.Sc. degree in Mining Engineering n Metal Mining and Coal Mining, respectively and later the M.Sc. degree in Mine Planning was introduced in 1972. Since, 1995-96 the department offers M.Tech. degree in Mine Environment, Mine Planning and Rock Mechanics.

The Department of Mining Engineering, BHU was one of the first in the country to receive UGC Assistance under COSIST and SAP Programme in 1984. Subsequently, the Department was upgraded as a Centre of Advanced Study in the area of Rock Mechanics and Ground Control in 1984.

The Department of Mining Engineering, IIT (BHU) occupies a pioneering position in the field of mining education and research. It has many firsts to its credit. The first Bachelor, Postgraduate and Doctoral degrees in mining engineering in India have been awarded by this department. Today's Mineral Industry is being run by many of its illustrious alumni who are holding key positions within the country and abroad. Senior faculty members have been recognized by the mining and allied industries as experts in the respective fields and are members of the important decision making bodies associated with CIMFR, NIRM, UGC, ISMU, NCL, CCL, SCCL, CIL, HZL, UCIL etc. The Department received generous grants to accelerate its research and developmental activities.

The Department is divided into six divisions with laboratories that are well equipped with the conventional and modern facilities. Facilities have also been developed for research in collaboration with mining industry to deal with their practical problems, these laboratories are also equipped to undertake fundamental research in the field of mining.

The above divisions consist of 19 laboratories. The Department is also provided with an Underground Experimental Model Mine well equipped for demonstration, experimental and research purposes particularly in the field of underground mechanised transport systems, mine ventilation and mine surveying experiments.

15. Department of Pharmaceutical Engineering and Technology

Year of Establishment: 1932

Head of the Department:

Dr. Sushil Kumar Singh up to 08.05.2018 (FN)

Dr. Sanjay Singh w.e.f. 08.05.2018 (AN) - 23.02.2019

Dr. Sushant Kumar Shrivastava w.e.f. 26.02.2019

1. Brief Introduction of the Department:

Department of Pharmaceutical Engineering & Technology is a pioneer in Pharmaceutical education in India at University level. It was started in July 1932 by Prof. Mahadev Lal Schroff under the auspicious guidance of Mahamana Madan Mohan Malaviya Ji. Initially, a two-year course was introduced in 1934 for the degree of B.Sc. (Pharmaceutical Chemistry). Later, the department has expanded academically by the inception of B.Pharm. (1937), M.Pharm. (1941), Ph.D. (1945) and integrated dual degree (2006) as its regular programmes. In the year 2014, the UG and IDD programmes have been restructured and renamed as 4-year B Tech Programme in Pharmaceutical Engineering and Technology and 5-year IDD (B Tech & M Tech) programme in Pharmaceutical Engineering and Technology, respectively.

The Department has produced over 2126 B.Pharm., 1184 M.Pharm., 52 M.Pharm.(Integrated Dual Degree) and 102 Ph.D. (as on May 2017) students who enjoy leading positions in industry, academia, drug administration, research institutes and contemporary pharmacy practice worldwide. The Department has also hosted many events at the National level and to name a few are the 17th, 34th & 59th editions of Indian Pharmaceutical Congress in the year 1965, 1982 & 2007 in conjunction with Silver Jubilee, Golden Jubilee and Platinum Jubilee of the Department, respectively.

Major areas of Research

The department is actively involved in the following broad research areas.

- i) Drug discovery – Identification and optimization of new chemical agents from natural and synthetic origin for the treatment of diabetes, epilepsy, depression, pain, Alzheimer’s disease, cancer, tuberculosis and other infectious diseases.

Unique Achievement /Preposition of the Department

The Department of Pharmaceutical Engineering & Technology is the pioneer department to start the degree level pharmacy education in the Country and in South-east Asia. This department is known for its enormous contribution to the growth and expansion of pharmaceutical education and research across the country. In pursuit of achieving its goal, the department has been continuously imparting quality education to produce pharmacists befitting to the requirements of industry and society. Recently the department introduced a research based undergraduate and integrated dual degree curriculum to impart innovative research skills and expertise among the students. Recent the department has proposed to start a new M Pharm programme; Quality Control in Pharmaceuticals and Medical Devices and is currently under review at the Institute level. The new M Pharm programme is aimed to provide the students in-depth knowledge of the quality methods for pharmaceutical substances and drug products prescribed in Indian Pharmacopoeia (IP) and enable them to gain extensive practical training on such products (including medical devices) in collaboration with Indian Pharmacopoeia Commission (IPC).

On the research front, the department has been actively engaged in the cutting edge research areas of drug discovery and development. The R & D expertise available in the department includes; (a) New drug target identification and validation; (b) Discovery of natural and synthetic lead compounds and their optimization; (c) Development of novel drug delivery systems including nano-formulations for synthetic and herbal drugs; (d) Authentication and standardization of herbal products; (e) Preclinical evaluation of drug candidates; (f) Analytical method development for drugs and drug formulations.

Apart from institute funded research projects, extramural research funding to the tune of about two crores has been generated during the last two years. To date, nearly 1600 peer-reviewed research papers have been documented by the department. Approximately ~700 research communications have been registered with Scopus alone. During the last five years, the department has published about ~300 peer-reviewed research papers. Besides this, a dozen of patents have been filed by the faculty members during the last five years. The high order research credits of faculty members viz., cumulative h-index of 210 and cumulative citations of ~26000, further corroborates the research strength of the department of Pharmaceutical Engineering & Technology.

Some of the key research accomplishments of the department in the area of drug discovery and development include; (a) discovered of some potential multifunctional anti-Alzheimer's and anticancer lead compounds, active at nanomolar to micromolar concentration, (b) enhancement of bioavailability and efficacy of drugs through nanoformulations and target-directed carrier systems, (c) identified newer cellular and molecular mechanisms involved in neuropathic pain, (d) developed a bioactive glass based formulation for the treatment of cerebral ischemia, and (e) created a well characterized natural product library of ~100 compounds from plants and microbial origin.

On an average the faculty members of the department publish around 60-70 peer-reviewed research papers annually. Over 14 patent applications have been filed by the faculty members so far.

Year of Establishment: 1986

Coordinator of the School: Prof. Pradeep Srivastava

Brief Introduction of the School:

The School was established for achieving several benchmarks in teaching and research in the modern field of Bio-engineering. It has kept on modernizing its programmes to impart education in upcoming areas of Biochemical engineering.

The School presently offers courses leading to IDD, M.Tech. and Ph.D. degrees in Biochemical Engineering. The School also offers courses to undergraduate students of Department of Chemical Engineering, Department of Pharmaceutics, and postgraduate students of School of Materials Science & Technology, School of Biomedical Engg, Department of Civil Engg, Department of Food Sc& Tech, IAgSc, and School of Biotechnology, Faculty of Science. In the new undergraduate curriculum, the School has been entrusted to offer a number of institute level courses either independently or jointly with other departments. The research facilities of the School are utilized not only by other departments of the institute and BHU but also by other teaching institutions and research laboratories. The faculty also guides.

Major areas of Research

1. BioProcess and Bioreactor Engg
2. Enzyme Engineering & Tissue Engineering
3. Molecular Biology and Genetic Engg

Area of the School (in square meters):

The School has been functioning the premise of Dept of Chemical Engineering since its inception. However, the school developed two dedicated laboratories in the Dept of Biochemical Engineering, IIT(BHU), subsequently has also developed its own building adjacent to the Dept of Chemical Engg (Total Area about 5,000 sq ft.). Recently the school has a new building, three storied which includes all teaching and Laboratories. The floor area of the new building of School is 10,000 sq. feet. (Total 30,000sq ft).

1.1.4 Infrastructure

The School has 12 laboratories, 06 lecture theatres, a 100 seat conference room, small library with textbook bank and internet facility. The School also has a seminar room and a few instruction rooms and rooms for its faculty. The School enjoys an excellent professional interaction with various industrial organizations, Experts and consultants. Faculty members are engaged in high level research collaborations and consultancy work in industry, where as some others have projects funded by the industry. Besides these, the School also provides know-how for process improvement/development, raw materials and products analysis, microbiological testing, etc to the industries in and around Varanasi.

18. School of Bio-Medical Engineering

Year of Establishment: 1978

Coordinator of the School: Prof. Neeraj Sharma (w.e.f. March 2016)

1. Brief Introduction of the Department/School:

Biomedical Engineering is a highly interdisciplinary and upcoming field of technology. The School of Biomedical Engineering is involved in Teaching and Research in collaboration with Institute of Medical Sciences (BHU), and with other Departments of IIT (BHU). The School follows a constant path of progress and diversification to be in pace with the time of change. The School runs the Integrated Dual Degree (IDD) program that offers B. Tech in Bioengineering and M. Tech in Biomedical Technology, besides there is also a two year M. Tech program and PhD program in Biomedical Engineering. Further, post-doctoral research opportunities are also available in the School for funded candidates. The school time to time updates the curriculum, introduces new electives and new practical components according to the requirements.

The objective of the School is to play an important role in the development of Biomedical Engineers. The research credentials of the School is multifarious and interdisciplinary so as to integrate all the thematic of the field in one common pool and thereby achieve progress in unison. The School of Biomedical Engineering was established by the UGC during the Fifth Five Year Plan in the year 1978. Banaras Hindu University is fortunate in having both the Institute of Technology and Institute of Medical Sciences in the same campus. This results in excellent collaborative work related to Biomedical Engineering. The infrastructure development work of the School was started in 1985 with the appointment of core faculty members.

Unique Achievement / Preposition of the Department/School

(A) Surgical Process for Reducing Spread of Brain Tumour:

The team of Prasun K. K. Roy have shown that the human brain's largest unidirectional fibre bundle (corpus callosum) has a second set of oblique fibre tracts, which enable migration of brain tumour cells (as glioma) in a second angular direction. Thereby these researchers have delineated that to lessen the tumour cell spread across brain tissue, one needs to also surgically interrupt the oblique tracts by ablation resection or radiosurgery.

(B) Preventive Neuroprotection Measures against Human Ageing:

Analysis of MRI signals and Brain Volumetry of Patients have been utilized in the laboratory of Prasun K. Roy to demonstrate that the Brain's interior White matter fibres enable the transport of neurotropic factors outwards to the exterior Grey Matter. This enables the generation and patterning of the Cerebral Cortex neural network. These findings indicate the feasibility of using neurotropic pharmacological agents (as Vitamin B3 related Pantothenate kinase 2 modulators) for neuroprotection during old-age induced degeneration or senescence.

(C) Materials for Health Care and Therapeutic Applications

The group of Dr. Pradip Paik has invented the nanomedicine for treatment of cerebral malaria. Dr. Paik's research group invented novel hydro-gel for tissue engineering. This invention is filled for Indian patent ((Ref. 201811045481, TEMP/E-1/49511/2018-DEL, December 1, 2018.) In this regards, Dr. Paik, has been awarded Outstanding Scientist Awards in Biomedical Engineering, by VIRA (11th August 2018). Dr. Paik's research group signed a new MoU with industry and for the translation of nanomedicine.

**(D) Extramural support and Industrial Collaboration**

The school received funding under the MODROBS scheme of MHRD. Projects from DST, DAE and CoirBoard were also obtained. The school was also funded under the DST-FIST program. Currently all faculty members are engaged in research. The school developed well equipped laboratories with financial assistance from various agencies. MoU's have been signed with medical device making companies and consultancy work are also done by the faculties.

Coordinator of the School: Dr. Akhilesh Kumar Singh (w.e.f. 10th November 2017)

1.1 Brief Introduction of the Department/School:

1. The School of Materials Science and Technology is an internationally renowned Centre of Materials Research and Education. It was established in 1978 following the recommendations of the V Plan Visiting Committee of the UGC. It serves as Institute's nodal center for fostering interdisciplinary teaching and research in the field of materials science and technology. School runs successful Ph.D., M.Tech. and Integrated Dual Degree programmes since 1982, 1984 and 2005, respectively. All these students are gainfully employed, several of them in premier Research and Development organizations, industry and teaching institutions. The syllabi of different programs are revised periodically to include topics of current significance in the field. Five-year dual degree programme leading to B.Tech. & M.Tech. Degrees together has been initiated from the session 2005-06 through JEE.
2. The School has a modest four floor building. The laboratories are equipped with modern and sophisticated equipment for materials preparation, characterization, processing and phase transformation studies. Working in these frontiers areas the faculty members of the School have generated nearly Rs. 13.5 crores during the last five years through various projects/schemes funded by agencies like DST, SERB, DBT, IMPRINT, DST-Nanomission, BRNS, SPARC, DRDO, UGC-DAE-CSR, etc. and have published more than 242 research papers in reputed journals such as Nature Comm., Phys. Rev. Lett., Appl. Phys. Lett., Phys. Rev. B, J. Phys. Cond. Matter, J. Appl. Phys., Acta Materialia, Macromolecules, Dalton Trans., J. Controlled Release, J. Mater. Chem, J. Citation: 186

Description: The inhibition and adsorption effects of the aqueous extracts of *Musa paradisica* (Banana) peels on mild steel corrosion in 1 M HCl as well as change in inhibition efficiency with ripening of the peels are investigated by weight loss measurement, electrochemical impedance spectroscopy (EIS), Tafel polarization and atomic force microscopy (AFM) techniques. Inhibition ability of the extracts decreases with the maturity stages. Furthermore, the extracts are characterized by FTIR spectroscopy, UV-visible spectroscopy and high performance liquid chromatography (HPLC) techniques. Adsorption behavior of the extracts is also studied, which suggest Langmuir isotherm model as a most suitable adsorption mechanism.

Citation: 146

Description: Although conventional chemotherapy has been successful to some extent, the main drawbacks of chemotherapy are its poor bioavailability, high-dose requirements, adverse side effects, low therapeutic indices, development of multiple drug resistance, and non-specific targeting. The main aim in the development of drug delivery vehicles is to successfully address these delivery-related problems and carry drugs to the desired sites of therapeutic action while reducing adverse side effects. In this review, we will discuss the different types of materials used as delivery vehicles for chemotherapeutic agents and their structural characteristics that improve the therapeutic efficacy of their drugs and will describe recent scientific advances in the area of chemotherapy, emphasizing challenges in cancer treatments

Citation: 60

Description: Hydrophobic anticancer drug, raloxifene hydrochloride (RH) is intercalated into a series of magnesium aluminum layered double hydroxides (LDHs) with various charge density anions through ion exchange technique for controlled drug delivery. The particle nature of the LDH in presence of drug is determined through electron microscopy and surface morphology. The release of drug from the RH intercalated LDHs was made very fast or sustained by altering the exchangeable anions followed by the modified Freundlich and

parabolic diffusion models. The drug release rate is explained from the interactions between the drug and LDHs along with order–disorder structure of drug intercalated LDHs. Nitrate bound LDH exhibits greater interaction with drug and sustained drug delivery against the loosely interacted phosphate bound LDH–drug, which shows fast release. Cell viability through MTT assay suggests drug intercalated LDHs as better drug delivery vehicle for cancer cell line against poor bioavailability of the pure drug. In vivo study with mice indicates the differential tumor healing which becomes fast for greater drug release system but the body weight index clearly hints at damaged organ in the case of fast release system. Histopathological experiment confirms the damaged liver of the mice treated either with pure drug or phosphate bound LDH–drug, fast release system, vis-à-vis normal liver cell morphology for sluggish drug release system with steady healing rate of tumor. These observations clearly demonstrate that nitrate bound LDH nanoparticle is a potential drug delivery vehicle for anticancer drugs without any side effect.

4. Monika Srivastava, SK Srivastava, NR Nirala, Rajiv Prakash (2014), A chitosan-based polyaniline–Au nanocomposite biosensor for determination of cholesterol, *Anal. Methods*, 2014, 6, 817-824

Citation: 46

Description: A polyaniline–gold (PAni–Au) nanocomposite is chemically synthesized and impregnated in a chitosan matrix for immobilization of cholesterol oxidase on an indium tin oxide-coated glass plate for development of cholesterol biosensors. The PAni–Au nanocomposite is characterized for structural and thermal properties. Further the PAni–Au nanocomposite is used for cholesterol oxidase immobilization and linkage is examined by FTIR. The nanocomposite is used to form a modified bioelectrode by immobilizing cholesterol oxidase in the chitosan matrix and examined under an optical microscope for uniformity and morphological studies. A modified bioelectrode (ChOx/PAni–Au–CH/ITO) is used to detect cholesterol by using a voltammetric technique with a redox mediator. The sensor exhibits linearity in a wide range of 50–500 mg dL⁻¹ with a detection limit of 37.89 mg dL⁻¹, a sensitivity of 0.86 μ A mg dL⁻¹ and a shelf life of more than 3 weeks when stored at 4 °C. Voltammetric studies have also been carried out with common possible interferents. Responses are recorded to get enzyme–substrate kinetics for the biosensor and found as $K_m = 10.84$ mg dL⁻¹. The low value of K_m indicates that the prepared nanocomposite facilitates the enzymatic reaction and enzymatic activity. Excellent immobilization and enzyme–substrate reactions show a distinct advantage of this matrix over other matrixes used for cholesterol biosensors. The novelty of the prepared electrode lies in its reusability, higher sensitivity, better shelf life, and accuracy.

Citation: 56

Description: Functionalization of poly(vinylidene fluoride) (PVDF) nanohybrid has been performed in template system using two-dimensional layered silicate and superior fuel cell membrane has been demonstrated. Sulfonation of nanohybrid has been carried out at control condition to maintain the mechanical stiffness and toughness of the membrane using chlorosulfonic acid and the results have been compared with pure PVDF. The sulfonation and its relative extent have been confirmed through NMR, FTIR and UV–vis measurements showing greater degree of functionalization in nanohybrid which arises from the specific arrangement of polymer chains on top of nanoplatelets. The structural change over from common crystallized form α - to piezoelectric β -phase in nanohybrid has been established and the amount of β -phase has been enhanced after sulfonation as evident from deconvoluted XRD patterns and DSC measurement. A plausible mechanism has been proposed for this improvement which led to the formation of smart membrane. Essential criteria of an ideal membrane have been verified through high water uptake, low permeability and hydrophilic nature by measuring contact angle. The molecular level clustering due to the attachment of sulfonate group in main chain has been explored which in turn explain the higher barrier property both for gas and liquid (fuel). Proton conductivity of functionalized nanohybrid has been found to be quite high along with significantly low methanol cross over as compared to

standard Nafion membrane. I–V characteristics of the nanohybrid membrane show high potential at low current density with considerably lower value of slope. Membrane electrode assembly using functionalized nanohybrid exhibit significantly high value of current density and prove its worth for superior fuel cell membrane using common thermoplastic polymer.

Head/Coordinator of the Department/School: Prof. Dhanesh Tiwary (w.e.f. 10.05.2018)

1. Brief Introduction of the Department/School:

The Department of Chemistry, IIT-BHU, previously known as Department of Applied Chemistry (Institute of Technology), was established in the year of 1985. Earlier this Department was functioning as a Section in the School of Basic Sciences in Banaras Hindu University-Varanasi. This Department currently constitutes 15 faculty members including 07 Professors, 1 Institute professor, 2 Associate Professors and 5 Assistant Professors. The prime responsibility of the department is to organize the teaching of chemistry courses in various B. Tech and integrated M. Tech programs. In addition, this department is also providing an excellent research platform to the students in various thrust areas of chemistry.

The Department of Chemistry offers a five-year Dual Degree M. Tech program in Industrial Chemistry and Ph. D programs in Organic, Inorganic, Physical and Analytical chemistry. More than 100 PhD's have been awarded from this department and about 50 students are currently pursuing their research. Research programs in the department have been supported by DST, CSIR, BRNS, UGC and AICTE. The department has received 85 lakhs from DST-FIST for the establishment of research and teaching facilities. The department is presently equipped with primary instruments including AAS, AFM, LC MS & GC MS, UV-Vis spectrophotometers, FTIR, and powder-XRD, Particle size analyser, NMR, etc.

21. Department of Mathematical Sciences

Year of Establishment: 1985

Head of the Department: Prof. Tanmoy Som (w.e.f. 04.11.2018)

Brief Introduction of the Department:

Department of Mathematical Sciences began its journey in the year 1968 as a section to assist engineering departments of the institute which, in the true sense, pioneered engineering education in the nation. It soon acquired the status of a full-fledged department in 1985. The department caters to the needs of the undergraduate as well as post-graduate students of the Institute. It runs a five years' Integrated Dual Degree program in Mathematics & Computing since 2005. This is one of the most sought courses offered by the institute. The top jobs in terms of the annual package by reputed MNCs are offered to the students for this course which indicates the popularity and usefulness of the course for the industrial growth in general and software industry, in particular, under present circumstances.

The department aims to emphasize research in analysis, algebra, topology, mathematical modeling, and other applied areas of mathematics. Be it functional analysis, algebra, numerical optimization, harmonic analysis, fracture mechanics, solid mechanics, fluid dynamics, heat and mass transfer, biomathematics, digital image processing, graph theory, parallel computing, queuing theory and many more fields of applied nature, the department's contribution is enormous in terms of numerous research papers published in reputed international journals over the past few decades. Computing is the glamour of the department. It annexes several dimensions in terms of new and growing areas of research and further facilitates the simulation of mathematical models constructed for interdisciplinary areas.

Major areas of Research

Functional Analysis, Fuzzy & Soft Set Theory, Soft Computing, Fuzzy Topology, Heat and Mass Transfer, Mathematical Modelling, Nonlinear Waves, Nonlinear Dynamics, Pseudo-Differential Operators, Wavelet Analysis and Distribution Theory, Fractional Calculus, Numerical analysis, Parallel Computing, Theoretical & Numerical Optimization, Harmonic analysis, Differential geometry, Mathematical modeling on Solid Mechanics, Fracture Mechanics, Coupled thermomechanics, Bio-Transport Processes, Biomechanics, Free Boundary Problems, Fluid dynamics, Digital Image Processing, Graph Theory and Network Sciences, Queueing theory.

22. Department of Physics

Year of Establishment : 1985 (Formerly Department of Applied Physics, IT, BHU, Applied Physics Section 1968)

Head of the Department : Dr. Prabhakar Singh (w.e.f. 24.08.2017)

1. Brief Introduction of the Department:

1.1 Introduction

Department of Physics (formerly Department of Applied Physics, IT, BHU / Applied Physics Section, 1968) established in 1985, is a center of excellence for quality research and teaching in Physics & Applied Physics. The evolution of Department of Physics in its present form took over nine decades. Since its inception, physics teaching was both integral and essential part of the technical education to enable young minds having good grounding in physical sciences. Therefore, initially all the three colleges (BENCO, TECHNO & MINMET) had their own faculty members in Physics to do the job. A turning point came in 1968 when BENCO, TECHNO & MINMET were merged under one umbrella of Institute of Technology, Banaras Hindu University (IT-BHU). This then made it meaningful to have all the physics teachers from these three colleges to join hands together to form an Applied Physics Section as a part of newly formed School of Applied Sciences. Finally, we became a Department of Applied Physics of IT-BHU in 1985. At long last, we became a Department of Physics in 2012 soon after the conversion of IT-BHU into IIT (BHU) on 29 June 2012. Faculties of the department have been pursuing cutting edge front line research in various areas and in collaboration with prestigious national and international institutes. The Department currently offers research programmes in the field of Solar Physics & Space Physics, Astrophysics, Cosmology, High Energy Physics, Nuclear & Particle Physics Fibre Optics, Photonics & Optoelectronics, Condensed Matter Physics & Materials physics, Microwave Remote Sensing, Bio-physics and Composite Materials, Energy Studies & Solid State Ionics, Quantum statistical mechanics and dynamics, Quantum entanglement and quantum information theory etc.

1.2 Major areas of Research

The department has a rich heritage and history of scientific research in space physics including theoretical study of the planetary atmosphere and solar magnetic field. In the mid 1970s, the whistler wave at low latitude were recorded for the first time and published in the prestigious "Nature" by the group of our department. (SP)²RG has been making significant contributions to the theory and modeling of solar plasma in optical, ultraviolet, X-ray, gamma-ray, and in the atomic spectroscopy – especially in the field of diagnostics of electron and proton beams and of the plasmas they heat. This group has been making seminal contributions in the areas of 'MHD waves and transients in the solar atmosphere' and also in 'science communication'. Theoretical calculations related to pitch-angle, cross-sections, scattering are also being carried out. Another group is actively working on the origin of the solar magnetic field, its dynamics using magnetohydrodynamics and the mysterious solar cycle using a novel theoretical (dynamo) model. The SP²RG has equipped with VLF-Antenna for upper Earth atmospheric measurements; Advanced Solar Computation and Analyses Laboratory (ASCAL) to analyse the large-scale solar observational data and model its magnetic atmosphere. SP²RG has global collaborations (e.g., UK, Poland, Russia, China, Austria, Spain, USA, Belgium, etc.) as well as participation in international (e.g., Royal Society; Polish National Science Foundation etc.), and national (e.g., 2m- National Large Solar Telescope; Aditya-I) projects.

The department has now several strong theoretical physics groups (Astrophysics & Astronomy, High Energy Physics, Nuclear & Particle Physics etc.) who are actively working on Structures and Dynamics of the Interstellar Medium, Large-scale gas fragmentation and star formation in galaxies, and Gravitational Lensing as an Astrophysical Probe, Cosmology / Cosmic Microwave background - Statistical Isotropy, Component separation, Low energy QCD at high precision, flavour physics, phenomenology of top, Higgs, vector-like fermions and singlet scalar fields, and model building, Nuclear Physics (Gamma Ray Spectroscopy, Nuclear structure model calculations - cranked Nilsson Strutinsky Model, Shell Model calculations).

The Department carries out a wide range of frontier research activities related to magnetism and superconductivity and semiconductors, nanostructures, thin films and nano-materials and is backed by many sophisticated equipment and measurement techniques. Though the main emphasis of these works is on fundamental aspects, many of the results have a potential for application in industries. In the materials science, we study the electronic, physical, mechanical, optical, and chemical properties of materials, most often in relation to their structure, and use this knowledge to understand and optimize their properties and create new, improved materials and devices. Work in Soft Condensed Matter and Bio-physics is also a front-line research area of the department. "Soft" condensed matter research explores areas like adhesion, friction, wetting, the movement of fluids in porous media, Modelling self-assembly and phase separation kinetics in the complex soft materials, understanding recent single molecule force spectroscopy experiments on biopolymers, Polymers under shear flow, etc. Biophysics and nanotechnology group aim is to investigate the interaction between 2D, 1D, and 0D materials with proteins and DNA. The main focus of this group is to develop sustainable technologies using green synthesis method utilizing medicinal plants and biopolymers for biomedical, energy and environmental applications like biosensors, drug delivery, OLED, bioelectronics and other nanotechnology applications using various experimental techniques and computational methods. Another theoretical physics group is also involved in understanding non-equilibrium dynamics of quantum many body systems with long range interaction.

Optics, Photonics and Fiber optics is emerging new field of research in our country. We establish a research lab with essential facilities to pursue the theoretical, experimental and computations researches in the field of Photonics. We are engaged in the theoretical analysis of photonic crystals and quasi photonic crystals composed of graded, dispersive and negative index materials. These works would be useful in study of the photonic crystals having such type of materials for various applications. It will open new window to design several photonic crystal devices like sensors, reflectors, switches etc. Research works on the Optical Instrumentation, Non-Destructive Imaging and testing, Computational Optics and Imaging through random complex media have also been initiated in our department. Such works has variety of practical applications in underwater imaging, bio-medical optics, space applications etc.

Research on remote sensing is also one of the frontline research areas in the Department. In this field, the growth of agricultural crops are monitored, classification of crops and the recognition of shape/size of buried objects are done by scatterometer measurements and satellite image analysis. Such studies are useful in designing of sensors, urban planning, crop classification, crop-yield and soil moisture estimation for agricultural planning.

Moreover, one of the groups is actively engaged in different types of luminescent materials, particularly inorganic nanostructures/phosphors having potential applications in the area of energy harvesting, bio-imaging and for advance lighting applications, etc. Composite material studies are also pursued at the Department and the lab for such studies is in development.

Research in the field of Green Energy and Solid State Ionics is also carried out in this Department. The energy studies explore the various fuel cells, materials, etc. to optimize the renewable energy sources. In the Green Energy area, the work on anode, cathode and electrolyte materials of Solid Oxide Fuel Cells (SOFC) is in focus. Also, preliminary establishment of lab towards the fabrication and characterization for Solar cells has been done. In addition to it, some work on hydrogen energy has also been started. Towards Solid State Ionics, the ion dynamics of the structurally disordered and crystalline materials is being studied. This study is not only restricted to the amorphous materials but also has been extended to the various materials of SOFC. Also, the work has also been started in the field of materials for nano piezo- pyro energy harvesters.

Department's vision is to promote new ideas and innovations in physical sciences. Our mission is to offer world class education, research guidance and also leadership in physical sciences. Our aim is to become a high ranking in Physics Department globally in terms of teaching quality, research contributions and academic leadership.

Under new curriculum process (which Institute has started in 2014) Department offers two physics courses at B. Tech-Part-I level as an institute science course and two physics courses to preparatory students. We also offer several electives and open electives under this new flexible project based curriculum. Our 5-year Integrated M. Tech. programme (IMD) in Engineering Physics which started in 2005 has been converted to Integrated Dual Degree (IDD) Programme from 2014 and is running successfully. Main objective of this course is to impart knowledge of various core technical disciplines without compromising on the basic physics and mathematics courses. The course gives an insight to the disciplines of engineering as well as science, and practical working experience through industrial training / summer internship, project / dissertation work to enhance the working skills of the students. Department will start the M.Sc. Programme in Physics from 2019-20 and students will be admitted through JAM.

Students of IMD/IDD (Engineering physics) are awarded with several fellowships to go abroad to pursue higher studies, involved in several project works in both science and technology, present their research works in different workshop/conference/symposia. 5. Technical Services Unit:

Even after an acute shortage of staff at the technical section, we decided to switch over to the DDC classification scheme from the existing CC classification scheme. More than 3500 volumes have been classified and catalogued using the classification scheme DDC. We have planned to convert all the books into DDC in due course of time.

6. Circulation Unit:

Main Library is open from 8:00 am to 11.00 pm hrs on all days. The circulation section provides a borrowing facility from 9:30 am to 6:00 pm Monday to Friday. The library membership increased by about 15% to more than 7000, including students, faculty and staff. From this year, the upper limit of borrowing of books for students, faculty and staff have increased by more than 50% and the loan period extends for 180 days for faculty and class one staff and 90 days for other grade staff.

7. Computer-Aided Reference Service Unit:

Until date, we are not able to develop a computer-aided reference service unit. However, an email “libraryservices@iitbhu.ac.in” dedicated to all types of reference has been created for any type of ready reference services.

8 Library Automation

Most of the library operations are automated. Library provides OPAC and circulation services using the library software “LibSys7”. The Web OPAC address is <http://opac-lib.iitbhu.ac.in/opac/> where anyone can search the available list of books. The mobile app “Search” is also active now and can be downloaded on the Android platform from the play store. This mobile app uses your Cellular data to search the library collection. The users are getting a notification through the mail for their check-ins, checkouts, a reminder for overdue of issue books. Now the library is planning to implement the RFID system for library circulation.

9. Initiative for Digital Library

The Library is the part of the Institute Network and has adequate computing infrastructure including 60 computers to cater to the needs of the users. The library home page (<https://www.iitbhu.ac.in/cf/lib>) a single window to all its resources and services, serves as a popular interface between users and the library. The library has its Institutional Digital Repository, and the repository is part of the National Digital Library. The Library has also created a separate digital library section which has 48 desktop computers. The Library is fully Wi-Fi enabled.

Remote access facility is also available. The library also provides a single search facility and Document Delivery service through J Gate.

5. **Events**

Centenary Celebration:

When the nation was striving towards independence, the legendary – Bharat Ratna Pt. Madan Mohan Malaviya had envisioned a future for India and founded the premier centre of multidisciplinary education- the Banaras Hindu University in the land of Lord Shiva. During the years, 1919-1924, the university started various engineering departments (earlier known as BENCO, MINMET and TECHNO), which were later integrated during 1969-1971 into Institute of Technology (IT-BHU). In 2012, it was converted into Indian Institute of Technology, Banaras

Hindu University, Varanasi with the vision of imparting world class engineering education, research and innovation.

Our proud institution commemorates its glorious journey of 100 Golden years of Engineering Education at Banaras Hindu University. Several events have been planned and some of them have already been well executed as part of the Centenary Celebrations during the year(s) 2018-2020. One of the biggest of those events was our Centenary Institute day (Basant Panchami 10th Feb, 2019) and Global Alumni Meet (9th Feb - 12th Feb, 2019).

Global Alumni Meet 2019 was a one of its kind event which marked its presence over the world through the widespread alumni community of IIT (BHU). The success of Global Alumni Meet was not as much in its magnitude, Media presence or Sponsor Recognition as was in the number of families it reconnected. The objective with which the Centenary Celebrations began was evident in the joyful faces when families met, got nostalgic, relieved their memories and felt rejuvenated.

Global Alumni Meet 2019 was an impressive 4-day event which commenced from 8th Feb to 12th Feb 2019. Organized by the Student Alumni Interaction Cell, GAM 2019 had the accomplished goal of expanding the Alumni Community and establishing stronger bonds between the institute and its alumni. The Grand Meet began with Institute and Varanasi City visits for Alumni who had reached campus a day prior to the inauguration ceremony.

The inauguration ceremony saw various alumni, students and faculty in the audience. The dais had Hon'ble Chief Minister Of Uttar Pradesh SHRI YOGI ADITYANATH Ji as the Chief Guest. The day went ahead with workshops by AWS-INTEL and Open House exhibition by Science and Technology Council. A busy day with Welcome Alumni address, Introduction of Clubs, Cells, etc, and then a cultural night, the perfect way call it a day.

Day 2 began with a splendid BASANT PANCHAMI JHAKI which saw participation from the alumni community, student fraternity and faculty of the institute. A march past till Malaviya Bhavan, it refreshed memories and in words of many alumni "brought the old days back." After a heavy lunch, everyone attended the Golden Jubilee Celebration of 1969 Batch. The first day of knowledge conclaves, panel discussion was indeed beneficial for the institute and the students. The NEXT100 sessions were very interactive and gave conclusions for shaping the next 100 years of the institute. Alumni Giving back session was successfully executed. The day set with a SPICAMAY cultural night to entertain the audience.

Day 3 was important with regards to vision of alumni and institute for the next 100 years. The day saw the celebration of past 100 years of engineering marvel and nation building with Awards of various categories being given. The Chief Guest for the Awards Ceremony was

Hon'ble Minister Shri Manoj Sinha ji who is also an alumnus of Civil 1979 Batch. After the Valedictory, Department Visits, Knowledge Conclave, Panel Discussion on the Next100 Start ups of IIT (BHU), it was time for the Vote of Thanks. The Global Alumni Meet ended with an exuberant Kavi Sammelan and an enthusiastic group of alumni and

students visiting the MAHAKUMBH at PRAYAGRAJ.

The 4 day celebration with a footfall of over 500 people had ended. It was a delight to watch how smiles were accompanied with tears in these 4 days. Apart from some flaws that might have occurred, the student fraternity was praised for its effort and management skills which again exemplified the bright future of IIT(BHU). The intention and task with which this began was well attained when crying faces left the campus only to come back to relive their moments, enjoy their nostalgia and see how swiftly time flew away.

Important Highlights of Global Alumni Meet (GAM) 2019 :

Inauguration of PARAM SHIVAY : As a mark of recognition of Centenary Celebrations of the institute, HON'BLE PRIME MINISTER SHRI NARENDRA MODI inaugurated The SUPECOMPUTER PARAM SHIVAY of 833 teraflop capacity built at the cost of Rs 32.5 crore under the National Super Computing Mission at IIT (BHU), Varanasi.

30. Institute Works Department

Ever since its inception in the year 2014, Institute Works Department (IWD) in IIT(BHU) shoulders the onus of major/minor repairs, maintenance, retrofitting, renovation and development of infrastructure along with proper operation and sustenance of existing utility lines. The upkeep and functioning of water distribution system, sewerage network, electrical overhead/underground cable lines, distribution sub-stations (DSSs), power sub-stations (PSSs) and SCADA system also pertain to the prime responsibility of IWD.

In addition to repair and maintenance of the hostels, guest house, faculty apartments/quarters and academic buildings, road side development and maintenance of the pavements/bituminous roads are duly undertaken by IWD. Depending upon the extent and quantum of work, IWD floats online tenders to award work-contracts to various vendors/contractors to execute maintenance/development related works of IIT(BHU) under compliance of GFR and standard practices of Civil/Electrical Engineering.

31. Main Workshop

Introduction

The vision of the founder of Banaras Hindu University, Pt. Madan Mohan Malviya ji, regarding the engineering education in this university can be seen in his own Wordings as stated below.

“To advance and diffuse such scientific, technical and professional knowledge combined with necessary practical training as is best calculated to help in promoting indigenous industries and in developing the material resources of the country.”

It is with this idea that Malviya ji went for a full scale Workshop in this engineering college, which was christened as Banaras Engineering College (BENCO). This workshop was used to produce every engineering item that was used in construction of producing machine tools – such as, Lathe and other product like electric fans, etc. This unit was providing technical assistance to Martin Burn Electricity Co. and also Diesel Locomotive Works for the maintenance and fabrication of their several items. It may kindly be noted that for a long time, this unit was a part of teaching department, i.e., the Mechanical Engineering Department. To make good use of the resources, both in terms of machines and manpower with the unit, it was providing technical and on the job technical training to less privileged section of the society. This was making extra manpower available to the University for producing useful products and taking various kinds of maintenance work, thereby saving enormous amount of money of the University. For example, the whole fleet of University vehicles was maintained by this workshop.

Activities (IIT-Main Workshop 2018 – 2019)

The Main Workshop of the Indian Institute of Technology (BHU) is offering the following services to the Institute/University/Outsiders.

At Institute Level

1. Training to B.Tech. Pt-I students of all branches and B.Tech. Pt-II Mech. Engg. Students to expose them to various manufacturing practice and processes.
2. Providing facilities for fabrication involved in project work to all the engineering students.
3. Helping students by way of fabricating the models and equipments for research.
4. Helping students by way of fabricating the models for Institutional Tech. Fest & Department fest like: Technex, Comet, etc.
5. Helping students in shaping the product that come out of their creative & innovative thinking.

At The Institute Level

1. Inspecting the furniture supplied to the different hostels of IIT (BHU).
2. Providing technical and support services in purchase and maintenance of the University vehicles of all types.
3. Providing facilities and also the technical know-how for development of industrial and innovative products.

To Outsiders

1. Training to the students of other engineering colleges.
2. Providing processing and production facilities to outsiders.
3. Providing Summer Training to the undergraduates of different Engineering College.

At the National Level

1. Organized National Seminar on “ Technological Advancement in Man-made Appliances of Rural Area” (TAMAR) on 04-06 January, 2019.

33. Central Instrumentation Facility

This year Central Instrument Facility created 3 new facilities X-ray photoelectron spectroscopy (XPS), Inductively coupled plasma mass spectrometry (ICP-MS) and BET surface area measurement facility for advance research for students and faculty members of the institute and other institutions as well as industries. A brief description of these facilities is given below.

X-ray photoelectron spectroscopy (XPS) - XPS is a surface-sensitive quantitative spectroscopic technique to measure the elemental composition, chemical state and electronic state of the elements based on X-Ray photoelectron emission on X-ray irradiation.

Inductively coupled plasma mass spectrometry (ICP-MS) - ICP-MS spectrometry uses an Inductively coupled plasma to ionize the samples and creates atomic and small polyatomic ions, which are then detected using mass spectroscopy. It is a well known technique to detect metals and non-metals in liquid samples at very low concentrations say ppb to ppt.

BET surface area measurement - BET surface area measurement based on physical adsorption of gas molecules on a solid surface and serves as the basis for an important analysis technique for the measurement of the specific surface area of materials.

Apart from above characterization facilities, centre is providing various advance characterization facilities to meet the demand of future research and technological applications. This year several thousand samples were characterize of researchers of IIT (BHU) and outside the institute.

Apart from characterization facilities institute is also providing fabrication techniques like PCB Prototyping and CNC Mill/ Lathe Production with simulator.
