COVID REVIEW

Special Issue on Covid -19

In this issue we have featured the work undertaken by various researchers and students at IIT Kharagpur related to COVID-19 healthcare and advisory

COVID-19 has brought the world to a standstill. With cases surging over 1200 infected and deaths crossing 30, by March 31, reports are coming in for India preparing for stage-III of the pandemic. The country has already announced a complete lockdown with special packages announced by the government to bolster healthcare facilities including medical equipment such as test kits, ventilators, hygiene products and even setting up of temporary COVID healthcare units. To support the billion-strong population during the lockdown, package has also been announced for free distribution of food and essential items. The giant players in Indian industries have extended their support to set up COVID hospitals or multiply ventilator production. Start-ups are coming up with prototypes of test kits and hygiene technologies. While all of these activities are picking up pace, IITs have engaged into product and process developments from preventive care to healthcare equipment to engaging people during lockdown. In this issue of IIT KGP Researcher we feature the work related to COVID-19 being undertaken by our researchers students and through projects.

IIT KGP Studies Explore COVID Lockdown

Researchers from the Ranbir and Chitra Gupta School of Infrastructure Design and Management and Dept of Civil Engineering at IIT Kharagpur have taken an initiative to carry out a study on travel and social distancing perspectives of Indian citizens during the recent outbreak of COVID-19. The study throws light on understanding people's preparedness in case of a lockdown, their travel behaviour and their perceptions during COVID-19 outbreak and assessing the impact of travel restrictions and social distancing on different aspects of life as per people's perceptions.

Patterns
The COVID-10 pandemic has resulted in significant changes in our day-to-day live

different people are changing their activity and travel patterns. We, researchers at IT KHARAGUR and UNIVERSITY OF LEEDS are attempting to analyse such changes through the information gathered from the following celline survey.

FEW IMPORTANT POINTS TO NOTE ABOUT THIS ONLINE SURVEY -

 In the guestionate, we see your answers for a scenarios (a) activity-invertible existing COVID situation; (b) activity-travel under normal NON-COVID situation in the past and (c) activity-travel under probable future COVID situations In another joint study by the Ranbir and Chitra Gupta School of Infrastructure Design and Management and the University of Leeds, researchers are trying to look into how COVID-19 might change social activities and travel patterns. The team believes that policies to overcome the crisis, while minimizing the disruptions, need a good understanding of how different people are changing their activity and travel patterns. They are conducting a survey in this regard.

<u>COVID-time Academics: Learning Never</u> <u>Stops</u>

It has been almost 2 weeks since the teaching and learning at IIT Kharagpur have gone virtual. The Center for Educational Technology at the Institute has been using the online interface Webex for conducting classes across all levels of study. Many faculty members have been teaching online on digital platforms such as Swayam, MOOCs and DTH platform Swayam Prabha. The lectures have already been uploaded on the respective platforms for the current semester. Additionally live lectures are being carried out through WebEx.

Researchers make Hand Sanitizer for Local Use

A team of researchers from IIT Kharagpur's School of Medical Science and Technology quickly developed an alcohol based hand rub following the present scenario of scarcity of hand sanitizers/ hand wash preparations in the market due to their heavy demand. The team created the formulation based on guidelines recommended by the World Health Organization. The Transport Section of the Institute has also developed another formulation.

Face Shields for Healthcare Workers During Lockdown

Prof. Santanu Dhara and Prof. Sangeeta Das Bhattacharya, researchers at the School of Medical Science and Technology at IIT Kharagpur have made a prototype to make face shields for healthcare workers from home during the lockdown. The face shield is an essential part of the personal protective equipment (PPE) required for healthcare workers taking care of patients with suspected COVID-19.

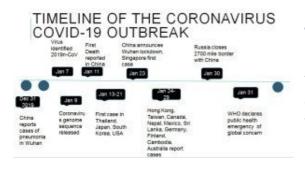

NDLI Study Module during COVID-19 Lockdown

IIT Kharagpur develops JEE Preparation Module on National Digital Library of India (NDLI) during COVID-19 Lockdown. Students can visit the NDLI website <u>https://www.ndl.gov.in/</u> or <u>https://ndl.iitkgp.ac.in/</u> or log on to the NDLI mobile application. A special module named 'Corona Outbreak: Study from Home' has been added to the website which contains a wide range of digital content including those preparing for competitive examinations like JEE Advanced. The repository contains NDLI Tutorial for JEE Advanced for 12 years and Practice Questions and Solutions for JEE Preparation. Content for JEE Mains for 5 years is expected to be made available soon.

Public Health Concerns

Prof. Sangeeta Bhattacharya talked about the threat to public health from COVID-19 and drew attention to the 'herd immunity' and ' R_0 ' numbers for COVID-19. 'How do you deal with a novel pathogen when there is no immunity in your population?' That is the question that we are grappling with now.

Invisible Leadership and the CoronaVirus Pandemic

IIT Kharagpur's Vinod Gupta School of Management assigned a Pandemic Case Study for Organizational Leadership education. The students will be studying the facts from diverse shades of leadership and understand the ethical issues connected to such situations as COVID-19 pandemic. They will also explore whether the Pandemic itself has acted as an invisible leader in enhancing work-life balance of people, cohabitation of species and environmental sustainability.
