

Implementations and actions taken for the maintenance of Green Policy in the IIT Mandi Campus (Housekeeping Department).

1. Solid waste management: Vermicomposting pits are ready and shortly have become operational;

So that the wet organic kitchen wastes from the central mess and all the residential apartments are

Being fed into the vermicomposting pits.

2. We have been successful in developing a waste segregation system by placing several bins. Dustbin set of green and blue bins after certain distances in the campus. Where, the green bins are meant for collection of bio-degradable wet wastes for the vermicomposting and the blue bins for non-biodegradable wastes for recycling or being transported to the Mandi town.

3. Cleanliness drives : Another important event is the cleanliness drive, where green office members, NSS students, student volunteers, some staffs and faculty members spend half a day in the "Swachh Bharat Abhijan" on "Earth Day" and during Social Activities and awareness programmes.

4. Waste water management: We have installed a Sewage Treatment Plant in our campus for the

recycling and conservation of sewage water, waste water from the entire campus, including all the

Buildings, offices, classrooms, labs, canteen, hostels and residential quarters. The waste water after

Recycling and treatment in the STP is discharged into the creeks and rivers.

5. Bio gas plant has been setup for dispose of food waste from the mess.
